Node.js Project 2: Small Project on Templates

Rehearsing the skills on

- Utilize EJS or JADE template engine with Express.js
- Parse JSON files using EJS templates

TASK:

1. Create an app which will send search query and fetch JSON data from an API of your choice. Use these lists for a reference: AnyAPI or Public-APIS.io. If reading creates problems, you can read the data from a local file.	2
2. Apply EJS/Jade templates to display the data.	1
3. Utilize partials for each page.	1
4. Use Pure.css or Bootstrap to style the pages	1
5. Deploy to Heroku. Return code to GitHub.	1
